1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 2, drawn to a trimmer having "a flow of forces that is closed in itself", classified in class 83, subclass 615.
 - II. Claim 3, drawn to trimmer having a pressing element with an oblique, elastic rear part, classified in class 83, subclass 459.
 - III. Claims 4-7, drawn to a trimmer having telescoping adaptors, classified in class 83, subclass 699.41.
 - IV. Claim 9, drawn to a trimmer having displaceable knives for knife changing, classified in class 83, subclass 563.
 - V. Claim 10, drawn to a trimmer having a block with elastic filled recesses, classified in class 83, subclass 465.
 - VI. Claims 11 and 12, drawn to a trimmer having two retractable and extendable conveyors, classified in class 198, subclass 586.
 - VII. Claim 13, drawn to a trimmer having separate disposal chutes, classified in class 83, subclass 102.

Claims 1 and 8 will be examined with any of the elected inventions

2. Claim 1 links the inventions of groups I-VII. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including

all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The inventions are distinct, each from the other because the inventions of groups I-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the trimmer of group III having telescoping adaptors could be used without the two retractable and extendable conveyors of group VI, and conversely, the trimmer having two retractable and extendable conveyors as in group VI could be used with non-telescoping adaptors, unlike the telescoping adaptors of group III. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday thru Thursday between 7am and 4pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
